GMO Testing Real-Time PCR Kits

The Truth Lies Within the Code

The production and commercialization of GM crops and derived food products in the global market cause increasing concerns about biosafety worldwide. Proper labeling and monitoring for contamination are the key elements for a successful food safety net. Monitoring consists of suitable sampling, access to reference material, and analytical methods for the precise determination of GMO components. The most convenient analytical method is targeting the genetic modification itself, i.e., modified DNA, via Real-Time Polymerase Chain Reaction (qPCR). Real-Time PCR testing method is suitable for various samples with different levels of processing and achieves excellent specificity. By using a sequential series of analysis workflow, all possibilities are evaluated and eliminated.

Our Bosphore GMO Screening kits offers validated, sensitive, accurate, and reliable results for food, feed, seed, and additive analysis. Our comprehensive products aims to fulfill all the needs of analysts from A to Z.

PLANT SPECIES DETECTION		25 rxn	50 rxn	100 rxn
Bosphore Plant Detection Kit v2	Internal Control Ready to Use PCR Master Mix	ABPDK1	ABPDK2	ABPDK3
Bosphore Plant Detection Kit v3	Internal Control Ready to Use PCR Master Mix	ABPDK4	ABPDK5	ABPDK6
Bosphore Soy Species Detection Kit v1	Internal Control Ready to Use PCR Master Mix	ABSOY1	ABSOY2	ABSOY3
Bosphore Corn/Maize Species Detection Kit v1	Internal Control Ready to Use PCR Master Mix	ABCOM1	ABCOM2	ABCOM3
Bosphore Cotton Species Detection Kit v1	Internal Control Ready to Use PCR Master Mix	ABCOT1	ABCOT2	ABCOT3

GMO Testing Real-Time PCR Kits

Bosphore GMO MON94100 Quantification Kit v1 Ready to Use Event-Specific PCR Master Mix	AB94Q1	AB94Q2	AB94Q3
Bosphore GMO DP23211 Detection Kit v1 Ready to Use Event-Specific PCR Master Mix	AB23D1	AB23D2	AB23D3
Bosphore GMO DP23211 Quantification Kit v1 Ready to Use Event-Specific PCR Master Mix	AB23Q1	AB23Q2	AB23Q3
Bosphore GMO DP915635 Detection Kit v1 Ready to Use Event-Specific PCR Master Mix	AB91D1	AB91D2	AB91D3
Bosphore GMO DP915635 Quantification Kit v1 Ready to Use Event-Specific PCR Master Mix	AB91Q1	AB91Q2	AB91Q3
Bosphore GMO MON87419 Detection Kit v1 Ready to Use Event-Specific PCR Master Mix	AB19D1	AB19D2	AB19D3
Bosphore GMO MON87419 Quantification Kit v1 Ready to Use Event-Specific PCR Master Mix	AB19Q1	AB19Q2	AB19Q3

Species Identification Real-Time PCR Kits

You Are What You Eat

Adulteration and content analysis in the meat industry are important for public health. Real-Time PCR method provides an advantage over other methods with its high sensitivity, accuracy, and fast results in the determination of closely related species.

Bosphore Species Identification Kits have different sensitivity values designed according to the area of use. Bosphore Species Identification v1 kits with 0.1% sensitivity are designed for analyzes requiring higher sensitivity. Reliable results can be obtained with Bosphore Species Identification v3 kits with 1% sensitivity in cases where eggs and poultry meat should not be included in the analysis due to the content requirement.

MEAT SPECIES IDENTIFICATION

Dairy Adulteration Real-Time PCR Kits

As Secure As Breast Milk

Adulteration is done by adding foreign or cheaper substances to foods or by replacing valuable ingredients. One of the most common examples of adulteration is the adulteration of milk from cheaper species such as cows with high economic value, such as water buffalo milk.

With the Bosphore Milk Species Identification Real-Time PCR Kits produced by Anatolia, it is possible to detect the presence of bovine, water buffalo, goat, and sheep DNA in milk and dairy product samples with 1% sensitivity.

DAIRY SPECIES IDENTIFICATION

Bosphore Species Identification Kit Sheep v2 Internal Control Ready to Use PCR Master Mix	ABSHE4	ABSHE5	ABSHE6

Food Safety Testing Real-Time PCR Kits

If It Is Not Safe, It Is Not Food

Foodborne pathogens have always been a major concern for public health. Surveillance and identification of the source of the outbreak can be a challenge. Food safety testing kits are used to detect harmful pathogens, contaminants, and allergens in food products to ensure the safety of consumption.

Real-Time PCR Kits play a vital role in preventing foodborne illnesses, protecting public health, and maintaining compliance with food safety regulations, especially by identifying harmful microorganisms.

Veterinary Products

Real-Time PCR Kits

Happy Livestock, Happy Life

In industrial livestock rearing, the health of stock must be kept at the top level not only because of animal welfare but also to minimize losses and costs. Infectious diseases are keen to spread to all animals, halting production, and requiring long treatment periods to recover. Regular scanning schemes against infectious diseases are a great way to prevent the spread. Real-Time PCR diagnosis tools as control measures are fast, simple, cost-efficient, and provide highly reliable results for the disease of interest.

Our Real-Time PCR-based veterinary diagnostic kits support the highest production efficiency by managing animal health. The growing product portfolio now offers solutions against Lumpy Skin Disease Virus (LSDV) and African Swine Fever Virus (ASFV).

DNA/RNA Extraction Kits

First Stop, DNA/RNA Extraction

Separating the DNA, or RNA, from everything that makes up the cell via chemical and physical methods is the prerequisite for Nucleic Acid Testing. Obtaining pure and quality DNA from a complex and processed sample is the first challenge the laboratories must face.

Anatolia offers a wide selection of DNA/RNA extraction kits and systems to overcome these challenges. From manual spin-column or magnetic particle-based kits to fully automated solutions, we aim to fulfill a variety of needs with a versatile selection of products.

SPIN COLUMN NUCLEIC ACID EXTRACTION

100 extractions

Bosphore Plant DNA Extraction Spin Kit

No organic extraction or alcohol precipitation
Starting Amount: 100-250 mg

ABXPD1

Bosphore Tissue Genomic DNA Extraction Spin Kit v2

No organic extraction or alcohol precipitation
Starting Amount: 100-250 mg

IVD CE

ABXTD2

Bosphore Bacterial DNA Extraction Spin Kit v2

No organic extraction or alcohol precipitation
Starting Volume: 400 µl

IVD CE

ABXBD3

Bosphore Viral RNA Extraction Spin Kit

No organic extraction or alcohol precipitation
Starting Volume : 400 µl

IVD CE

ABXVR1

Bosphore Viral DNA Extraction Spin Kit

No organic extraction or alcohol precipitation
Starting Volume : 200 µl

IVD CE

ABXVD1

Bosphore Nucleic Acid Extraction Versatile Spin Kit

No organic extraction or alcohol precipitation
Starting Volume : 250-400 µl

IVD CE

ABXGV1

DNA/RNA Extraction Kits

MANUAL MAGNETIC BEAD NUCLEIC ACID EXTRACTION

96 extractions

Magrev Tissue Genomic DNA Extraction Kit

Magnetic Bead Technology
Starting Amount : 20-150 mg (recommended)

AEMTD1

Magrev Plant DNA Extraction Kit

Magnetic Bead Technology
Starting Amount : 250 mg (recommended)

AEMPD1

Magrev Viral DNA/RNA Extraction Kit

Magnetic Bead Technology
Starting Volume : 500 µl (recommended)

AEMDR1

AUTOMATED NUCLEIC ACID EXTRACTION

96 extractions

192 extractions

UNIO Food DNA Extraction Kit

Magnetic Bead Technology
Starting Volume : 200-400-600 µl

UFDR600

UNIO M32 Food Extraction Kit

Magnetic Bead Technology

UM32FE1

UM32FE2

Instruments

UNIO B24 Extraction System

UNIO B24 Extraction System is a laboratory instrument for automated extraction of nucleic acids (DNA/RNA) from various food samples (meat, milk, seed, feed, gelatin, chocolate, lecithin, dietary supplements etc.) and bacteria using paramagnetic particles. UNIO B24 Extraction System enables fast, pure, efficient and contamination-free nucleic acid extraction using embedded protocols ready-to-use cartridge system pre-filled by automation.

Features

- ✓ Automated Extraction
- ✓ Prefilled Cartridges for 1-24 Samples
- ✓ UV Lamp Decontamination
- ✓ PCR Setup Option with Dedicated Racks

Workflow

Method	Fully automated extraction with silica-coated magnetic beads
Capacity	1-24 samples
Sample Volume	100/200/400/600 µL
Elution Volume	60/100/150/200 µL
Efficiency	Up to 10 µg/200 µL
Heating Block	✓
UV Light	✓
Size and Weight	D: 580 x W: 660 x H: 920 mm - 110 kg
Run Time	From 18 to 110 minutes
Ordering Information	AUB24

UNIO M32 Extraction System

UNIO M32 Extraction System is an automated laboratory instrument for nucleic acid extraction (DNA and RNA) from various food samples (meat, milk, seed, feed, gelatin, chocolate, lecithin, dietary supplements etc.) and bacteria using paramagnetic particles. It is based on silica-coated magnetic beads for use in downstream PCR applications, for diagnostic purposes. UNIO M32 consists of an LCD touchscreen for ease of use. This instrument can process 1 to 32 samples after a short preparation time. UNIO M32 Viral DNA/RNA Extraction Kit is compatible with this device for various applications.

Features

- ✓ Prefilled Plates
- ✓ Automated Extraction
- ✓ UV Lamp Decontamination

Workflow

Method	Fully automated extraction with silica-coated magnetic beads
Capacity	1-32 samples
Sample Volume	100/200 µL
Elution Volume	100 µL
Heating Block	✓
UV Light	✓
Size and Weight	D: 310 x W: 385 x H: 369 mm – 18 kg
Ordering Information	AUM32

Montania 4896 Real-Time PCR Instrument

Montania
4896

IVDR

IVD CE

Montania 4896 Real-Time PCR Instrument is a huge step forward in molecular diagnostic laboratory practice, redefining standards with twin 48-well blocks and software enabling the simultaneous or asynchronous performance of two different assays.

Features

- ✓ Real-Time PCR Instrument with Independently Controlled Twin Blocks
- ✓ Simultaneous or Asynchronous Run Options of Different Thermal Protocols
- ✓ HRM, Allelic Discrimination, Relative Quantification
- ✓ For Diagnostics and Research Fields
- ✓ Capacity of 96 Stamples, 4 Channels

Workflow

Real-Time PCR

Analysis

Report

Capacity	96 (Twin 48 well independent blocks) samples
Light Source	LED
Temperature Range	4-99 °C
Max Ramp Rate	4.5 °C/sec
Temperature Accuracy	+/- 0.1 °C
Temperature Uniformity	+/- 0.1 °C
Sample Size	15-100 µL
Filter Pairs/ Wave Lengths (nm)	4 (470/510- 530/565-580/620-630/665)
Dyes	FAM/SYBR Green, VIC/HEX/JOE/TET, ROX/Texas Red, Cy5

Magrev 24 Manual Magnetic Bead Nucleic Acid Extraction Stand

Magrev
24

IVDR

IVD CE

Magrev 24 Manual Magnetic Bead Nucleic Acid Extraction Stand for 24 Samples and Magrev Mini Base Extraction Stand are extremely advantageous and cost-effective platforms. Magrev is a very attractive system for both research and also diagnostics purposes.

Genomic DNA extraction for 24 samples requires only 10 minutes of hands-on time, without the need for changing tube positions, also with no need for centrifugation. It's not a prerequisite, but using a 6-channel adjustable spacer pipette makes the system even more practical and therefore is highly recommended. Nucleic acid extraction can be performed from various food samples (meat, milk, seed, feed, gelatin, chocolate, lecithin, dietary supplements etc.) and bacteria using paramagnetic particles.

Ordering Information | AEMB24

Magrev Mini Manual Magnetic Bead Nucleic Acid Extraction Stand

Magrev
mini

IVDR

IVD CE

Magrev Mini Extraction Stand Base Unit provides the advantages of Magrev 24 Manual Extraction Stand with a twist! If you are handling smaller number of samples, Magrev Mini base unit gives you the liberty to increase the slots you can work as many as you wish, depending on your samples.

Magrev Mini, designed, patented and produced by Anatolia, is a unique approach to manual nucleic acid extraction by using magnetic beads.

Nucleic acid extraction can be performed from various food samples (meat, milk, seed, feed, gelatin, chocolate, lecithin, dietary supplements etc.) and bacteria using paramagnetic particles.

for 1 sample | AEMMM1

Anatolia was established in Istanbul in 2010 by partners with decades of experience in molecular genetics, healthcare, mechanical engineering, and marketing. This interdisciplinary structure of the company is the key factor in creating solution-oriented and efficient products for people in a wide geography.

Our main expertise is designing, developing, and manufacturing Real-Time PCR kits, nucleic acid extraction kits, rapid antigen test kits and automated nucleic acid extraction instruments. With the integration of Real-Time PCR instruments manufactured under Anatolia is one of the very few companies in the world with the ability to create turnkey solutions for Real-Time PCR applications.

Anatolia carries out its relevant operations in accordance with the ISO 9001:2015, ISO 13485:2016 standards, 98/79/EC directive, EU 2017/746 IVDR and 2006/42/EC regulations. Anatolia became the first company in Türkiye to get IVDR certification for high-risk molecular diagnostic products.

Anatolia Tani A.Ş. has been authorized as an R&D Center in April 2017 by the Republic of Türkiye Ministry of Industry and Technology. As of 21st October 2021, Anatolia became a publicly listed company in the Istanbul Stock Exchange (BIST).

Anatolia has subsidiaries abroad in Germany, the Netherlands, Italy, Poland, Bulgaria, Pakistan, and the Philippines.

The company's primary goals are to achieve worldwide market success by developing and manufacturing high-quality molecular diagnostics products, as well as increasing Türkiye's independence in the field of molecular diagnostics and biotechnology. Anatolia operates in the R&D and manufacturing laboratories and in the CNC workshops, which ultimately have an advanced infrastructure. The company guarantees the high precision, sensitivity, reproducibility, performance, and quality of its products by stringent quality control procedures in compliance with the regulations and quality standards.

Anatolia Tani ve Biyoteknoloji Urunleri Ar-Ge San. ve Tic. A.S.
